Chapter 2

USING CHARTS AND TABLES

Tables and charts are often used to compare information. Tables present data in columns and rows. By looking at a table, you can see trends and relationships more easily than if the information were written in text form.

Directions: Study the table below and answer the questions that follow.

Population and Gross National Product of Selected Countries, 1999

Country	Population (in millions)	Gross National Product (in billions of dollars)
Australia	19	380.6
Botswana	2	5.6
Canada	31	612.2
China	1,239	928.9
Honduras	6	4.5
Nepal	23	4.8
United States	270	7,921.3

Source: World Development Report 1999/2000, The World Bank.

- How does the population of Nepal compare with the population of Australia?

- Which country listed in the table has the largest population?

- Which country listed in the table has the highest gross national product?

- If you divide the GNP by the population, which country has the higher per capita GNP, Honduras or Botswana?

- How does the per capita GNP of China compare with that of Canada?
